AOC

Spring/Summer 2011

Imagine Excellence

PRODUCT HIGHLIGHTS

Product Highlights

FIRST INNOVATIONS 2011

AOC, a top brand in the global display market, introduces a range of new exciting products. Among the highlights are an extremely affordable Tablet PC with Android operating system, a super stylish ultra-slim 58.2 cm/23” display with a state-of-the-art IPS panel as well as a large Full HD monitor. Moreover, AOC has extended its portfolio with its first, flicker-free 3D display. The range is rounded off by a series of flat panel displays with LED backlight in a classic black finish.

AOC displays excel with outstanding features, crisp images, attractive design as well as numerous energy saving functions and ecological production processes.

Spring/Summer 2011

TABLET PC

PERFECT FOR WORK AND PLEASURE –

AT HOME AND ON THE GO

Checking your emails from the comfort of your home or following the news via WLAN while out? Showing friends your latest party pics in a café or on the balcony? No problem with the 20.3 cm/8” AOC Tablet PC. Equipped with a touchscreen (800 x 600 pixels) and Android 2.1, this newcomer is the best choice for anyone wanting to take a quick glance at the live football coverage or the YouTube charts. Sound can be enjoyed either via the integrated speaker or plugged-in headphones.

Despite the sensational price, the build quality of this Tablet PC with its attractive black finish is extremely high. Thanks to the rubberised back, AOC’s latest product addition with its 4 GB flash memory sits very comfortably in your hand. Best connectivity is ensured by a microSD slot as well as a USB 2.0 port, which can accommodate a variety of peripheral devices.

Sound through integrated speaker or plugged-in headphones

i2353Fh

STYLISH 9.6 MM DISPLAY:

EQUALLY SUITED FOR THE OFFICE AND HOME

This high-tech 58.4 cm/23” Full HD flatscreen with its super-slim 9.6 mm profile is targeted at business and home users alike. It manifests its strengths in office applications as well as games. The innovative IPS panel ensures a realistic colour reproduction and high colour stability, which makes the model ideal for image editing purposes. A high dynamic contrast ratio (50,000,000:1) ensures crisp images with finest details.

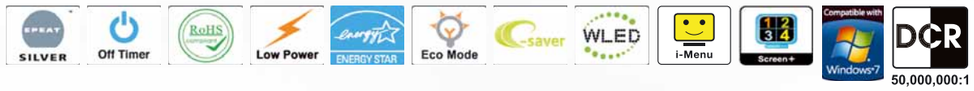
The i2353Fh comes with two HDMI ports, offering a multitude of options for connecting high-definition sources. Action-packed games or movies are rendered smoothly thanks to its response time of 5 milliseconds.

Discreet touch controls

Stand with tilt function

Inputs in the stand avoid cables hanging from the display

Ultra-slim profile



e2795Vh

LARGE FULL HD MONITOR

FOR OFFICE AND ACTION

Whether for complex spreadsheets, double-page texts, image editing, exciting games or fascinating films – the huge screen area with a diagonal of nearly 70 cm/27” provides copious room for office applications and exciting entertainment. Thanks to its resolution of 1920 x 1080 pixels (Full HD) plus DVI-D and HDMI inputs, high resolution content from various sources is perfectly rendered.

The stereo loudspeakers discreetly integrated into the bezel deliver a respectable sound. The MVA panel is equipped with an LED backlight making images even livelier and brighter.

Analogue and digital inputs

Two USB ports

Clear menu controls

THE THIRD DIMENSION

FOR MOVIES AND GAMES

Watching films in spectacular three-dimensional space at home? Experiencing 3D games actually in three dimensions? All this is possible with the new AOC 3D display. The 58.5 cm/23” LED panel features a filter glass designed to display 3D as well as 2D images flicker-free. For the 3D home cinema enjoyment in Full HD (1920 x 1080 pixels) all that is needed is a pair of light-weight polarised glasses (included). Sound is delivered by stereo speakers. Thanks to wide viewing angles plus DVI and HDMI inputs with HDCP (analogue input also available) you are all set for a joint 3D movie night.

Slim profile

Plugs can be inserted horizontally

50th ID

MULTITALENTED

WITH LED BACKLIGHT

The latest display technology, strong performance as well as a timeless classic black design are the hallmarks of the new 50th ID series by AOC. With seven screen sizes ranging from 47 cm/18.5” to 60 cm/23.6” each and every demand will be met. Thanks to high contrast and brightness values of 20,000,000:1 and 250 cd/m² respectively as well as a short response time of five milliseconds, high-speed movie sequences are rendered smoothly and in crisp detail.

The 50th ID series monitors are available with analogue and/or digital inputs (some come with HDMI), the larger displays offer Full HD resolution. Depending on individual requirements, users can choose between models with height adjustment and/or USB port.

Easily accessible input sockets

Height-adjustable (some models)

Slim profile, tiltable display
